

"Floorworks® is a great quality product at a great value and everybody is extremely satisfied with it."

Frontier Science

When not-for-profit research foundation Frontier Science embarked on a renovation for its Boston headquarters, durable and easy to clean flooring was a high priority. In the heavily traveled main reception area, the existing carpet had a dated look, stained easily, and was not tough enough to withstand the high foot traffic and rolling carts that frequently pass through.

Design Nathalie Assens of ZVI Construction considered several resilient flooring options, including a natural stone, and selected Floorworks® Tile in Cherokee Slate for its durability, authentic stone look, and ease of maintenance. Nathalie chose Floorworks® Tile in the warming color of Oyster Slate for the 4,000 square foot cafeteria.

"Floorworks® is a great quality product at a great value and everybody is extremely satisfied with it. The client is raving about it," said Nathalie.
